

BROADWAY TRANSPORT

About

Broadway Transport was established in 1981 with the specific intention of serving the needs of the healthcare sector by offering a specialised service, focused exclusively on the handling and delivery of medical products.

In the many years since its foundation, Broadway Transport has become a leading provider of advanced logistics solutions to both manufacturers and suppliers of goods to the healthcare market exclusively and has attained an excellent reputation within healthcare, for providing a level of service that is second to none.

At Broadway Transport we realise that, to maintain and build upon our excellent reputation, we need to ensure that we offer our customers a service that exceeds expectations every time. As such we are driven by a program of continuous improvement and have a culture that is focused entirely on achieving customer satisfaction.

We understand that the healthcare supply chain is ever changing and that not all of our customers have the same service requirements, as such we offer a number of services from same day

and standard overnight pallet delivery, to home patient deliveries and fully outsourced warehousing and logistics solutions.

We are fully accredited to the ISO 9001:2008 standard and ensure that all of our drivers are vetted through the CRB (Criminal Records Bureau) system.

- 28 Years experience of working exclusively within healthcare
- Accredited to ISO 9001:2008 standard
- CRB vetted drivers
- Committed to customer satisfaction and continuous Improvement
- Multi disciplined logistics services dedicated to serving the healthcare industry
- Dedicated one to one customer support adviser

BROADWAY TRANSPORT

Deliveries to Healthcare

Broadway Transport has been providing specialist delivery services to the healthcare industry since its foundation in 1981, throughout which time we have acquired an invaluable amount of experience in working alongside suppliers and manufacturers of medical products to ensure that their goods arrive on time, in a perfect condition, free from dust dirt or other contaminants.

We work closely with healthcare professionals within both the NHS and the Private Healthcare Sector to ensure that we fully understand the needs of both our customers and their customers.

Because Broadway Transport deals with the healthcare industry exclusively, we understand the many component parts that combine to make up what would appear to many a very complicated supply chain. As such, we are able to meet your demands regardless of the point at which your organisation joins the supply chain.

If you are a supplier of medical devices, equipment or consumables to wards, distribution centres or patient homes or a manufacturer who brings in bulk container deliveries from overseas which need to be broken down and prepared for sterilisation, Broadway Transport has the ability to satisfy your need.

All of our drivers are vetted through the CRB (Criminal Records Bureau) and are well trained to carry out specific and unique instructions. All drivers are required to wear the company uniform at all times and will go about their daily activities in a discreet and professional manner.

Technology plays an important role in any modern logistics operation and Broadway Transport is no exception making use of modern job and vehicle tracking equipment as well as sophisticated fleet management software, enabling us to ensure that your consignments are delivered on time, in a well maintained, modern fleet.

- Deliveries to sterilisation
- Deliveries to NHS depots
- Ward level delivery and stock rotation
- Home patient delivery
- Deliveries to manufacturing plants and warehouses
- Removal of unwanted packaging and pallets
- Modern well maintained fleet
- Sophisticated fleet management and tracking systems
- Uniformed, well trained drivers
- CRB checked drivers

BROADWAY TRANSPORT

Outsourced Logistics

At Broadway Transport we recognise that many businesses, particularly small to medium size enterprises, do not want the hassle and expense of running a distribution operation.

When one considers the cost of renting or purchasing warehouse space, staffing and management, handling equipment such as forklift trucks and other overheads such as heating and lighting, it is easy to understand why many companies are reluctant to acquire their own warehousing facilities.

When you add the need for complex, often expensive stock management systems and all of the costs associated with the implementation and ongoing training required to utilise them to their full potential, the option of an outsourced logistics solution is often a welcomed alternative.

Broadway Transport has 28 years experience in the handling and distribution of medical products exclusively and understand the complexities of the healthcare supply chain including lot/batch control and full product traceability, stock rotation, cross docking including NHS

Blue Diamond, product sterilisation documentation and many other healthcare specific processes.

Broadway Transport has the facilities, staff and capacity to handle all of your distribution needs from receipt of goods from suppliers in the UK or overseas through to picking, packing and final delivery of your product. We can provide weekly or monthly reports on stock levels, sales activity and stock movements plus many other reports which are all available via email in an easy to read format.

- Fully outsourced distribution
- Warehousing facilities
- Goods receipt
- Picking and packing
- Stock traceability
- Lot/batch tracking
- Varied reports via email
